Amendments to the Specification:

Please replace paragraph [63] beginning on page 21 with the following amended paragraph:

To do this, the client is required to display the drawings of the building intended to build, and however, if the client has no drawings of the building, the client may select a sample of a building having a structure similar to the building the client intends to build from various sample buildings the service provider exhibits (S243a). This service is made available by storing various kinds of drawings and displaying the drawings as requested. Then, the drawing of the air conditioner the client selected is applied to the drawing of the building either the client shown or the service provider suggests by using a graphic program provided on the web page (S243b). The program may be a general program used for various design and architectural design, and, more preferably, a program that can provide a 3D simulation function for permitting, not only display of drawings, but also a 3D image display of an inside structure of the building and product. It is preferable that the graphic program is a program having a function for combining two or more than two drawings. By applying a product image to a drawing of the building displayed on the web page by using the drag and drop function, to make a realtime 3D simulation to combine the two images and display a result of the application on the web page, the client can ascertain a proper application with easy (S243c). The display may be in 3D or in drawings. If a result of the foregoing application is not satisfactory to the client, the client returns to the step before the application, so that the client selects drawings of other building, or

other product, and makes a required application, again (S243d).

Please replace paragraph [67] beginning on page 22 with the following amended paragraph:

Once the client determines to buy a product (the air conditioner the client fixes, or the air conditioner the service provider suggested) according to the foregoing process (S244), spec-in of the drawing is made (S245). The spec-in is putting a product name on the design drawings for approval from a relevant ward office on starting of the building. For reference, once the spec-in is made, the building is expected to be built with the product installed thereon, unless there is an amendment to the design, separately.
